

I.T PROFESSIONAL

Insightful, and results driven I.T Professional with success assisting with a broad range of I.T security initiatives while in the nonprofit sector. Also responsible for assisting with the planning, analysis, and implementation of solutions in support of business initiatives. Passionate about increasing individual and organizational efficacy, and technological knowledge.

Hands on experience with many stages of system development efforts, including design, testing, and support.

I am hoping to expand my systems development, web development, and leadership skillsets through new professional opportunities.
